DETAILED ACTION

Drawings

1. The drawings were received on 03/02/2007. These drawings are acceptable.

Specification

2. Based on the amendment, the previous objection to the specification has been removed.

Allowable Subject Matter

3. Claims 1,2,4-9,11-16 and 18-21 are allowed.

The following is the statement of reasons for the indication of allowable subject matter: The prior art disclosed by the applicant and cited by the Examiner fail to teach or suggest, alone or in combination, ***all*** the limitations of the independent claim(s) (*claim 1,8 and 15*), particularly having to burst-write instruction being an active instruction in the TAP controller.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure as cited in form PTO-892 of the previous office action.

US Pat. No. 6,947,884 to Swoboda discloses use of a single line to carry TMS control signals and a data signal, thereby freeing up one of the signal lines. This is done through multiplexing of both the control and data signal. However, Swoboda does not disclose receiving data from both an input line and control line of a TAP controller in response to a burst-write instruction being an active instruction in the TAP controller.

US Pat. Pub. No. 2005/0166106 to Warren discloses use of JTAG and sampling at both the edges of TCK to increase speed of JTAG. However, Swoboda does not

Art Unit: 2182

disclose receiving data from both an input line and control line of a TAP controller in response to a burst-write instruction being an active instruction in the TAP controller.
